CRISCO

Is a scientific discovery that will affect every kitchen in the Islands.

A delicious cooking material made from vegetable oils.

You won't realize what it is until you try it.

ALL GROCERS

Keep Cool!

It takes more than the suggestion to keep cool these days. It really can be done only with an

Electric Fan

Just attach it to the chandelier in place of a lamp. It uses less current than a 16-candlepower lamp.

We have them complete from

\$10.00 up

NORGAARD RECOMMENDS BOARD EXTEND CAMPAIGN ON STOCK

Thinks Fight Against Animal Tuberculosis Should Extend to Other Islands

Dr. Victor A. Norgaard, in a report to the board of agriculture and forestry on human and bovine tuberculosis, speaks of the great work done on this island in eradicating tuberculosis from dairy cattle herds and urges the extension of the campaign to the other islands. He says in opening: "Four years ago I had the honor to represent this board as a delegate to the Ninth International Tuberculosis Congress, held at Washington, D. C. "As a result thereof I do not hesitate to say that the city and county of Honolulu is today practically free from bovine tuberculosis, and that the milk supply of Honolulu has been improved a hundred-fold, and is today on a par with the best that is to be found anywhere. Thereby is not meant that it is perfect—far from it, as will be shown, but what in most places is considered an insurmountable obstacle, something to avoid or shirk or circumvent, that is, the eradication of tuberculosis from the dairy herds, has been accomplished in one of the counties of the territory, and has demonstrated that the same can be done in the entire group. "The principal reason I am taking this subject up at some length in this report is that two of my deputies, on

Hawaii and Maui, are of the opinion that tuberculosis has recently begun to spread at a much increased rate among the dairy herds in their respective districts, and, further, that I have every reason to believe that had the work of eradication been delayed or deferred even one year longer here, we should have found conditions which it would have been impossible to tackle without extraordinary means and measures.

"There have been times during the past four years when I have been in doubt as to the advisability or the justice of the policy adhered to, that is, the absolute and uncompromising eradication of the disease, the toleration not even of a single reacting animal on premises where milk is produced for human consumption, but I am happy to say, that as the reports on similar work done in other states, territories or foreign countries are received, it has become more and more certain, that under conditions like those which obtain here, there can be no procrastination, no dilatory methods,—that if we were to conquer the disease here, it could be only by way of the slaughter house and not by any 'Bank,' 'Ostertag' or 'Birmingham' or any other method of eradication."

After devoting many pages to a resume of reports of the tenth International Tuberculosis Congress held in Rome this summer, Dr. Norgaard returns to the local question in part as follows:

"But taken altogether the improvement in the local milk supply which has resulted directly from the eradication of tuberculosis from the herds,—not alone on account of the removal of the diseased animals, but to a very great extent also from the enforcement of the provisions of the Milk Ordinance incidental upon the repeated visits of the inspecting and testing officers (the City milk inspector always accompanies the testing inspectors)—can hardly be conceived and must without doubt have contributed greatly to the general health of the community."

"When to this is added that outside of the purchase of an automobile, which would have been required anyhow no special expenditure or appropriation has been required, that in fact this Division, in spite of increased duties, is doing all the work with one \$12000 officer less than during preceding biennial period, then it seems to me that there is every reason for the extension of this work to the entire Territory."

"Reverting to the transmissibility of bovine tuberculosis to human beings, and especially to children, and at the

same time remembering the appalling prevalence of tuberculosis among the population here, and especially among the natives—more than 25 per cent. of all cases of generalized tuberculosis among children under 16 years being due to the bovine type of tubercle bacilli, that is, tuberculosis introduced by milk from tuberculous cows, then it appears to me indefensible to allow a single tuberculous animal to remain in the islands since it has been demonstrated conclusively that the disease can be eradicated.

"In the estimates of expenditures of the Division of Animal Industry for the present year I asked for \$3000 for the extension of the bovine tuberculosis work to the other islands. As I am informed that no money is available for the purpose, I would respectfully suggest, in case the board approves of the proposed work and so long as the sum required is insignificant in comparison to the human lives which may be conserved, that possibly the means can be obtained from other sources. The last legislature, for instance, appropriated \$25,000 for tuberculosis work. If all of this money has not been expended, I can see no better way to do it than by assisting in exterminating the only known source of human infection which can be exterminated."

UPSET STOMACH AND INDIGESTION

"Pape's Diapiesin" Cures Sour, Gassy Stomachs in Five Minutes

Time it! In five minutes all stomach distress will go. No indigestion, heartburn, sourness or belching of gas, acid, or eructations of undigested food, no dizziness, floating, foul breath of headache.

Pape's Diapiesin is noted for its speed in regulating upset stomachs. It is the surest, quickest and most certain remedy in the whole world and besides it is harmless.

Millions of men and women now eat their favorite foods without fear—they know now it is needless to have a bad stomach.

Please, for your sake, get a large fifty-cent case of Pape's Diapiesin from any drug store and put your stomach right. Don't keep on being miserable—life is too short—you are not here long, so make your stay agreeable. Eat what you like and digest it—enjoy it, without dread of rebellion in the stomach.

Diapiesin belongs in your home anyway. It should be kept handy, should one of the family eat something which doesn't agree with them or in case of an attack of indigestion, dyspepsia, gas, or stomach derangement at day-time or during the night it is there to give the quickest, surest relief known.
